**Condition terms:** Conditions valid till 31.05.2022, discounts can be changed 1 week notice

**Marketing Support:** TBC

**DESCRIPTION:** acoustic design panel collection MARCATO will complement your space with a spirit of nature. The panels of this collection are made from 8 mm black polyester felt, together with black, medium density wood fibreboards (MDF), the top layer of which is covered with precious wood veneer or laminate. The slats are 26 mm wide and each arranged with a 14 mm distance.

For the construction of the panels a 3-5 mm overlap is being used with the adjacent panel, as a result of which no visible seam lines are formed for several pieces connected together. The panels are fastened with mounting glue or special screws offered.
