DECORATIVE WALL PANELS IN REAL WOOD.

Sun-Burned boards - under the influence of weather and temperature changes over different seasons and centuries wood has transformed into antique wood boards with unique appearance. Like the flow of river through the centuries smoothing edges of cliffs; rain, frost, hail and sun are taking care of timber, leaving deep and strong fingerprints of nature, as well as colouring it from light grey to almost black. These boards usually come from old barns and mills where boards have been left under the influence of wind, rain and sun for decades. **Hand-Hewn boards** - to get logs squared by axes is one of the oldest timber processing ways that currently is not used anymore. Nevertheless such handcrafted timber is beautiful and unique, completely reflecting remedies of time. Carefully processed and cleaned with greatest attention to the colour and texture.
